Mongoose Find All Example

```
app.get("/list", function(request, response) {
    Fruit.find({}, function(error, fruits) {
        if (error) throw error;

        response.render("list", {
            title: "Fruit List",
            fruits: fruits
        });
    });
});

<% if (fruits.length) { %>
<h2>-- Fruit Listing --</h2><br />
<a href="/new">Add New</a>
<table class="table table-hover">
    <thead class="thead-dark">
    <tr>
        <th>Name</th>
    </tr>
    </thead>
    <tbody>
    <% fruits.forEach(function (entry) { %>
    <tr>
        <td><%= entry.name %></td>
    </tr>
    </tbody>
    <% }) %>
</table>
<% } else { %>
No entries! <a href="/new">Add one!</a>
<% } %>
```
